Statesville, NC 28677

**SURVEYORS 9 A.M. - NOON**

**HAULERS 1 - 4 P.M.**

The 2024 Surveyors/Haulers Series will prepare firms to do business with NCDOT. Surveying will focus on NCDOT Construction Stakeout requirements and how they compare to land surveying. Subjects will include but not be limited to safety, mobilization, risk, and the requirements of specifications and the NCDOT Manual on Construction Layout. Hauler workshops will focus on working with both contractors and the NCDOT as a hauler. Topics may include but not be limited to safety, typical work items and the haulers risk, expanding from hauling to placing and the risk, understanding methods of payment and considerations for each type, insurance requirements, and additional work codes haulers may be eligible to achieve. The sessions will also provide an overview of the NCDOT Standard Specifications and Standard Drawings. These outreach sessions will be in partnership with industry professionals working in the field. Technical training for these two groups will be held in three (3) regions of the state: Western, Central and Eastern. Half Day (Surveyors)/Half Day (Haulers). To register, please scan the QR code or visit the website: [www.ncdot.gov/highwaystechtraining](http://www.ncdot.gov/highwaystechtraining). For questions, please email: [ccu@ncdot.gov](mailto:ccu@ncdot.gov) or call: 984-810-9276.
